

# Indace

InEffects® Speckles are a premium special effect additive to produce a granite appearance in plastics. Speckles are broadly compatible in thermoplastic resin processing, due to its unique resistance to heat and shear.

## InEffects Speckles

Black and White are readily available, and custom colors can be formulated to match your specific need. InEffects® Speckles are standard to be light stable for outdoor exposure.

### Resistance to Heat and Shear

Speckles are resistant to 525° F (275 ° C). Speckles resist breaking by shear in typical plastic processing: injection molding, extrusion, blow molding, rotational molding.

### FDA Compliance

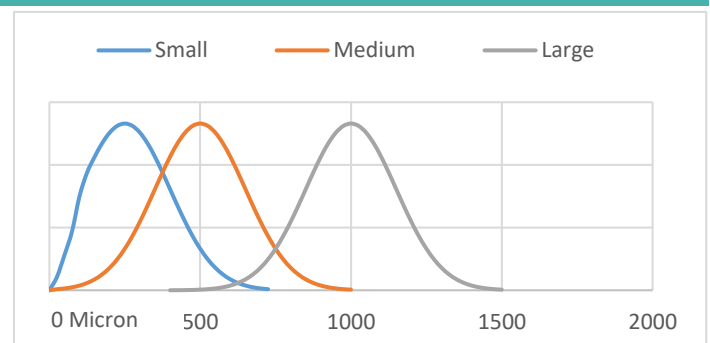

Speckles are prepared entirely of materials suitable for US FDA compliance for food contact articles.

### Available Sizes

Speckles are available in three primary size distributions.

Small – About 250 micron mean size.  
Medium – About 500 micron mean size.  
Large – About 1000 micron mean size.

Other sizes available upon request.
